### Detail of Work Contents

Our laboratory conducts R&D to solve the gap between what can be achieved by information technology and what users expect from the perspective of users of cyberspace, as well as factors that hinder the diffusion and appropriate operation of cybersecurity technology. The person engaged in will conduct the necessary survey and analysis on the R&D.

Employees to be hired through this recruitment may apply for external competitive research fundings such as Grant-in-Aid for Scientific Research (KAKENHI) and NICT's internal research fundings.

The Article 15(2) of the Act on the activation of Science, Technology and Innovation will be applied to this work content.

### Application requirement

Interest in R&D related to cyber security. Research experience related to the fields of psychology or cognitive science and human-computer interaction. Familiarity with psychological research and statistical analysis methods, and the ability to handle the tools used in research and analysis. Ability to communicate smoothly with collaborators inside and outside the laboratory, and to engage in R&D in cooperation and collaboration.

[Welcome requirements]

Expertise in AI techniques such as data mining, or cyber security. Qualifications in cyber security.
