### Work Contents

#### (Research theme)
Research and development on gallium oxide devices (device processing)

#### Detail of Work Contents
Research and development on fundamental technologies for electrical devices based on novel widegap semiconductor: gallium oxide (Ga2O3). The successful candidates will be in charge of Ga2O3 device processing.

The Article 15(2) of the Act on the activation of Science, Technology and Innovation will be applied to this work content.

Employees to be hired through this recruitment may apply for external competitive research fundings such as Grant-in-Aid for Scientific Research (KAKENHI) and NICT’s internal research fundings.

### Application requirement
Ph.D. or equivalent in Electrical Engineering or a related discipline, with 5+ years of industry experience (R&D and production). Minimum 3 years of R&D hands-on experiences in semiconductor electrical device processing and characterization. Special consideration will be given to candidates with expertise and experience in device fabrication process and characterization based on widegap, compound semiconductor materials (GaN, SiC, GaAs etc).

### Recruiting (Number of people)
