■ Job Information

Subject No.	2025R-97
Job Title	Fixed Term Researcher
Department	Advanced ICT Research Institute / Center for Information and Neural Networks, Neural Information Engineering Laboratory
Work Contents (Research theme)	Study on computational theory of decision making
Detail of Work Contents	Theoretical research on the mathematical mechanisms of decision-making including learning, memory retrieval, and action selection, as well as on the brain dynamics that underlyies these functions. The Article 15(2) of the Act on the activation of Science, Technology and Innovation will be applied to this work content.
	Employees to be hired through this recruitment may apply for external competitive research fundings such as Grant-in-Aid for Scientific Research (KAKENHI) and NICT's internal research fundings.
Application requirement	Demonstrable skills in methematical analysis and programming (e.g., Python , Matlab, R) are required. Strong publication history in computational neuroscience relevant to decision making is also required Experience in experimental studies is not necessary. Candidate should have or is scheduled to receive a Ph.D.
Recruiting (Number of people)	1
Contract period	hiring date 〜 March 31,2026 N.B. Contract will not be renewed.
Salary (basic salary)	¥484,000 〜 ¥516,000／month Basic salary shall be determined by taking into account each employee's experience and task to be engaged in. However, as a basic salary is compliant with government employees' wages, it shall be changed when a basic salary is changed after labor union and the like of NICT agreed under a revision to the government employees' wages.
Work Place	Center for Information and Neural Networks (Suita-shi,Osaka)
Working frequency	5days/week（7.5hours/day）

*Department name and work place including work contents (research theme) and detail of work contents might change according to organizational change, etc.
*Scope of change in work and workplace : No changes are expected in general.
