■ Job Information

Subject No.	2027R-40
Job Title	Fixed Term Researcher
Department	Universal Communication Research Institute / Advanced Science and Technology Research Center for Multimodal AI Communication, Multimodal Speech Communication Laboratory
Work Contents （Research theme）	Research and Development of Multilingual Speech Synthesis Technology for Content Dubbing
Detail of Work Contents	The appointee will be engaged in R & D on multi-language speech-synthesis technology capable of transmitting not only linguistic information accurately but also non-verbal information such as emotions. The research will also address advanced speech translation technologies by integrating speech recognition, machine translation, and speech synthesis into a unified framework. The Article 15(2) of the Act on the activation of Science, Technology and Innovation will be applied to this work content.
	Employees to be hired through this recruitment may apply for external competitive research fundings such as Grant-in-Aid for Scientific Research (KAKENHI) and NICT's internal research fundings.
Application requirement	Applicants must meet the following requirements: -Hold a Ph.D. in informatics, computer science, or a related field. -Have a proven track record in spoken language processing, image processing, machine learning, or artificial intelligence. Research experience in speech synthesis is preferred. -Possess strong communication and academic writing skills in English. -Be proficient in Python, with experience using frameworks such as PyTorch, Transformers, ESPnet, DeepSpeed, and Megatron-LM. -(Preferred) Experience in the development and management of commercial speech synthesis systems in private companies. -Demonstrate enthusiasm for research and the ability to work collaboratively with team members.
