Subject No.	2027R-58
Job Title	Research Assistant
Department	Radio Research Institute / Electromagnetic Advanced and Infrastructure Research Center, Space-Time Standards Laboratory
Work Contents （Research theme)	Research assistance for time and frequency synchronization using wireless communication for frequency-sharing technology in low Earth orbit satellites.
Detail of Work Contents	To advance frequency-sharing technology in low Earth orbit satellites, it is required to assist activities on the research and development of time and frequency synchronization using small atomic clocks and wireless communication technology.
	The Article 15(2) of the Act on the activation of Science, Technology and Innovation will be applied to this work content.
Application requirement	Applicants must have a bachelor's degree or higher and be able to communicate smoothly with collaborators both inside and outside the laboratory, working in coordination and cooperation on research. Students with exclusive commitment obligations, such as those under the Japan Society for the Promotion of Science (JSPS) fellowship, are not eligible to apply. If you are receiving grants that require exclusive dedication to research, or if you have plans for short-term study abroad or internships at companies, please indicate this in your resume (we are open to discussing the frequency of work and the timing of activities as a research assistant).
