

■ Job Information

Subject No.	2026T-180
Job Title	Fixed Term Research Engineer
Department	Radio Research Institute / Electromagnetic Advanced and Infrastructure Research Center, Electromagnetic Compatibility Laboratory
Work Contents (Research theme)	Research assistance on improving efficiency and ensuring reliability of technologies for assessing human exposure to radio-frequency electromagnetic fields
Detail of Work Contents	This position involves supporting research and development aimed at developing technologies for the efficient assessment of induced quantities in the human body due to radio-frequency electromagnetic exposure, as well as advancing high-precision measurement infrastructure technologies that ensure the validity of exposure assessment results. The Article 15(2) of the Act on the activation of Science and Technology and Innovation will be applied to this work content.
	Employees to be hired through this recruitment are obliged to concentrate on their duties.
Application requirement	- An interest in research and development and related activities concerning protection from human exposure to radio-frequency electromagnetic fields, and possessing advanced expertise or technical skills in electromagnetic theory and/or radio-wave measurement. - A master's degree, or abilities and experience recognized as equivalent. - Ability to communicate and present research in either Japanese or English. - Programming skills for processing electromagnetic field measurement data, and desirable to have engineering expertise relevant to electromagnetic exposure assessment and its analysis, such as plane wave spectrum analysis and electromagnetic inverse problems.
Recruiting (Number of people)	1
Contract period	hiring date ~ March 31,2027 N.B. Contract could be renewed.
The employment period in case of fully renewing	Up to March 31,2031 if certain conditions are fulfilled
Salary (basic salary)	¥485, 000/month Basic salary shall be determined by taking into account each employee's experience and task to be engaged in. However, as a basic salary is compliant with government employees' wages, it shall be changed when a basic salary is changed after labor union and the like of NICT agreed under a revision to the government employees' wages.
Work Place	Headquarters (Koganei-shi, Tokyo)
Working frequency	5days/week (7.5hours/day)

* Scope of change in work and workplace : No changes are expected in general

* The expressions used in "Work Contents (Research theme)" and "Detail of Work Contents" and the names of "Department" and "Work Place" may be subject to change due to organizational restructuring or other reasons.
