

CENTRES OF THE GPAI EXPERT COMMUNITY

GPAI Associated Project Updates

GPAL Associated Project Tokyo Innovation Workshop 2025

1.Date:

✓ May 28th and 29th, 2025

2.Venue:

✓ Tokyo Nihonbashi Tower, 4th, 5th and 15th floor (NICT Innovation Center)

3.Participants:

✓ GPAL community of Experts, Government representatives, External experts, etc.

4.Object

✓ To provide experts and government representatives with the opportunities to **interact and discuss face-to-face**

✓ To identify **key issues** to focus on in 2026 and future roadmaps

✓ To draft **concept notes** with the intention of preparing projects

5. Contents

✓ Plenary sessions

✓ Group sessions (Group Theme)

1. AI utilization in **Global South** and strengthening of domestic and global AI ecosystem
1. **Interoperability** of international AI governance frameworks
2. **Multilingual and Multicultural AI**
3. **Open Source AI**

Tokyo Nihonbashi Tower

Tokyo Innovation Workshop 2025 -Data on On-site Participants-

The workshop welcomed **137 on-site participants from 36 countries**, and **over 170 participants from 41 countries in total**, including those who joined online.

Participants Profile

Participants by Region

Over 170 participants including online participants

Groups and Moderators

- ✓ On the first day, participants were divided into **12 groups**. On the second day, the groups with the same theme were merged, allowing for deeper and more integrated discussions.
- ✓ **Groups were basically moderated by GPAI experts (GPAI1.0 or AIGO/ONE AI)**, ensuring productive and fruitful dialogue throughout the sessions.

* shows GPAI experts (GPAI1.0 or AIGO/ONE AI)

Themes	Moderators
Global South (4 groups)	<ul style="list-style-type: none">• Pam Dixon (World Privacy Forum, USA) *• Basheerhamad Shadrach (CEMCA, India) *• Seydina Moussa (Cheikh Hamidou Kane University, Senegal) *• Atsushi Yamanaka (JICA, Japan)
Interoperability (4 groups)	<ul style="list-style-type: none">• Uros Poluga (GPAI Co-Chair, Serbia) *GPAI co-chair• Lee Tiedrich (Duke University, USA)*• Kyoko Yoshinaga (Keio University, Japan)*• Robert Kroplewski (Legal Adviser, Ministry for Digitalisation of the Information Society, Poland)*
Multilingual & Multicultural (2 groups)	<ul style="list-style-type: none">• Jeff Ward (Animikii Indigenous Technology, Canada)*• Thierry Warin (HEC Montréal, Canada)*
Open Source (2 groups)	<ul style="list-style-type: none">• Amir Banifatemi (Cognizant, USA)*• Maya Sherman (Embassy of Israel in India, Israel)*

Tokyo Innovation Workshop 2025 – Outcomes (Open Source / Multicultural) –

Title: Making open source AI tools more accessible

■ Background (why):

- ✓ Lack of widely used tools / framework for safe and responsible open source models.
- ✓ Lack of resources for smaller national actors, skilling and training

■ Project Description (what):

- ✓ **Building the governance framework needed support for the safe and sustainable expansion of open-source AI.** (Launch a public consultation to identify cross-sector needs, conduct a gap analysis of existing governance related tools, and develop a taxonomy to map tooling across the AI lifecycle)
- ✓ The project will help open-source AI ecosystems evolve with greater trust, coordination and resilience.

Title: Multicultural AI consortium

■ Background (why):

- ✓ Currently available/widespread AI systems (predominantly LLMs) **are not set up to account the rich diversity culture globally** (languages are a vector for culture, values, etc.)
- ✓ Languages that do not have as much data to provide can be overlooked so there's a need to prioritize data availability must create the incentivize

■ Project Description (what):

- ✓ **Development of a consortium to enable multicultural and multilingual AI models**

Tokyo Innovation Workshop 2025 – Outcomes (Interoperability) –

Title: Dynamic mapping of AI governance frameworks' detailed activities & measures

■ Background (why):

- ✓ Existing work maps high-level principles
- ✓ Practitioners still struggle to know what else they have to do to meet expectations of Framework X

■ Project Description (what):

- ✓ Map details of similarly focused subsets of existing frameworks: OECD, NIST AI RMF, ISO/IEC, CEN/CLC, EU Codes of Practice, HUDERIA, Japan GfB, Singapore AI Verify, Hiroshima Code, other regulatory frameworks/standards/ etc.

Title: Creating Interoperability Among Policy Frameworks to Unlock Data and Inputs/Outputs for AI Innovation

■ Background and Objectives (why):

- ✓ AI innovation requires vast amounts of data.
- ✓ Data can be subject to a wide range of legal requirements that vary across jurisdictions making it **challenging to optimize and share data to advance AI innovation.**

■ Project Description (what):

- ✓ Develop voluntary standard **technical/governance tools** that will **facilitate the voluntary use and exchange of data**
- ✓ Voluntarily apply these tools and terms to commercial settings and to advance social good.
- ✓ Create an international sandbox to test the voluntary standard technical / governance tools

Tokyo Innovation Workshop 2025 – Outcomes (Global South) –

Title: AI living lab for Impact

■ **Background (why):**

- ✓ Need to strengthen AI ecosystem; Need to reduce AI inequalities; Encourage community-led AI initiatives; Include all in the AI skilling ecosystem; Protect national sovereignty

■ **Project Description (what):**

- ✓ **Collect, share and test good practices - data, use cases, observatories** and enable all stakeholders to participate and learn
- ✓ AI living lab shall be **open, adaptable and scalable across sectors, geographies and contexts**

Survey results of Tokyo Innovation Workshop 2025①

- ✓ Following the Tokyo Innovation Workshop, we **conducted a participant survey and received responses** from 76 individuals, representing just **over half of the total attendees**.
- ✓ Regarding the **selection of the themes**, **72% of respondents indicated that all four themes were appropriate**, while 25% felt that other important themes should have been included.
- ✓ Regarding **the way the group discussions**, 53% were very satisfied, 39% were somewhat satisfied, and in total, **over 90% of participants expressed satisfaction**.

- ✓ Please respond regarding the content of the **four selected themes**

● (1) All four themes were appropriate. ● (2) There were other important themes that should have been included.
● (3) Some of the selected themes were not relevant.

- ✓ Were you **satisfied with the way** the group discussions were conducted?

● (1) Very satisfied ● (2) Somewhat satisfied ● (3) Somewhat dissatisfied

Survey results of Tokyo Innovation Workshop 2025②

- ✓ Regarding **the results of the group discussion**, 53% were very satisfied, 38% were somewhat satisfied, and in total, **over 90% of participants expressed satisfaction**.
- ✓ As for the significance of participating in this Innovation Workshop, 36% of participants indicated that their main objective was **to network with unfamiliar experts**. Meanwhile, 32% aimed **to gain new perspectives on AI challenges and potential solutions**, 15% sought to **exchange ideas with familiar experts**, and another 15% hoped to **build consensus on issues to be discussed at future GPAI and OECD meetings**.

- ✓ Were you **satisfied** with the summary **results** of the group discussion?

● (1) Very satisfied ● (2) Somewhat satisfied ● (3) Somewhat dissatisfied ● (4) Very dissatisfied

- ✓ What was the **significance** of participating in this Innovation Workshop?

● (1) Networking with experts I had not met before. ● (2) Reconnecting and exchanging ideas with experts I already knew.
● (3) Gaining new perspectives on AI challenges and potential solutions.
● (4) Developing a certain degree of consensus on the issues to be discussed at future GPAI or OECD meetings. ● others

Survey results of Tokyo Innovation Workshop 2025③

- ✓ Regarding the **location** of future Innovation Workshops, **47%** of participants preferred to be held in **different cities around the world**, **25%** favored **continuing the rotation among the three centers**, and 18% expressed a preference for locations that are easily accessible.
- ✓ As for the **frequency** of Innovation Workshops, **66%** preferred that they be held **annually**, while **23%** favored holding them **multiple times a year**.

- ✓ What approach would you prefer for selecting future Innovation Workshops **locations**?

- Continue rotating among the three centers.
- Prioritize accessibility so that more experts can participate.
- Expand to as many different cities around the world as possible.
- Organize back-to-back with GPAI meetings or other relevant conferences to increase attendance.
- others

- ✓ **How often** do you think Innovation Workshops should be held in the future?

- Every year
- Every other year
- Multiple times a year
- Whenever a host country or organization expresses interest

**We would like to express our sincere gratitude to everyone
who participated in the workshop**
